We Are SME

sme | membership

SME IS HERE TO SUPPORT YOU

When you join SME for free as an educator, you receive access to:

- Knowledge and learning resources to augment your classroom lectures and assignments.
- Local manufacturing professionals who can serve as advisors, mentors and classroom speakers.
- An online social network where you can pose questions to a global community of manufacturers, practitioners and educators.
- Student competition announcements.
- Scholarship information from the SME Education Foundation and our partners.
- Online career-preparation resources for students.
- Tours of local companies and entrance to regional trade shows and other manufacturing events, where you and your students can see the latest tools and technologies in action.

Educators can advance their own professional development through industry events and peer-to-peer networking.

JOIN SME TODAY

- Complete the online high school educator application at:
sme.org/hs-educator

HOW TO IMPLEMENT IN YOUR SCHOOL

1. Access Digital SME Membership Kit

Go to sme.org/highschool-membership to access the digital high school membership kit. The kit contains applications for students to join SME, informational videos and communication fliers that can be downloaded and shared with students, parents, counselors and administrators.

2. Pick A Sign-up Day

Choose the day(s) to implement SME High School Membership in your school. On this day, all students **go online** (mobile device, computer lab, etc.) and **complete the SME membership application**. We recommend students watch the SME videos found in the membership kit to discover more about their new technical professional organization, SME.

3. Students Create Their Profiles

On this day(s), students go online, access their SME accounts and **start creating their SME student profile**. The student account is active throughout their high school years so encourage them to update their profiles each semester. Once students activate their account, they gain access to the **SME Connect** high school student community, where they can associate with other STEM/CTE students and educators.

4. Students Create Their Resume

After a student joins SME, encourage them to create their SME profile and start their high school resume on STEM Premier. Students can invite teachers, parents or a mentor to provide guidance over their resume development and obtain an **SME digital badge** to display on profiles.

To provide each student and educator with a beneficial and memorable membership experience, SME partners with:
